-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I in the reply filed on October 23, 2003 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1,2,5 and 6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim1-28 of U.S. Patent No. 6004652. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims do not exclude the openings in the reinforcing layer due to the open claim language drawn to "comprising".

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by either Seksaria et al (5244745) or Blacklin et al (4411121).

Both of the above references disclose a dimpled layer, wherein the dimples are spaced from one another and a reinforcing or face layer connected to the dimples. Refer to figures 1 and 2 in Seksaria et al showing a spaced (14) dimpled (16,22) sheet attached (18,26) to a face sheet (12). Refer to figures 6,7 and 11-13 in Blacklin et al showing a spaced (16) dimpled (12) sheet connected (13) to a face sheet (20).

6. Claims 1,2,5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by either Takahashi et al (5156327) or Jurisich (3622430).

Both references teach a sheet with dimples extending from both sides. The dimples are not touching and misaligned (the dimple directly above another dimple extends in the opposite direction as shown in applicant's figure 10A). A face sheet is attached to each side of the dimples (i.e. two reinforcing face sheets are present). Refer to figures 4 and 6 in Takahashi et al showing dimpled (13) sheet (11) attached two face layers (14a,14b), which are substantially the same as applicant's figure 10A. Refer to figures 1 and 2 in Jurisich showing dimpled sheet (32,33,34) attached to face sheets (25,34).
